EDIT 250 Technology Skills for Educators – COURSE DESCRIPTION

This course is designed to familiarize educators with a variety of information and communication technology related resources that are available to support and enhance classroom instruction, and to develop basic competencies needed to use these resources in the classroom. Topics covered will include changes to the learning landscape, the development of 21st century skills, the integration of web based technologies into the classroom, the use of digital imaging, and other technologies that can provide the basis for enhancing the curriculum in a classroom and online setting.

This class is organized by weeks with an Orientation Week prior to the beginning of the four-week intensive. The Orientation must be completed before you will be allowed to start the intensive. Please introduce yourself in D2L during the Orientation Week. The course will require 80 – 120 hours of study. Students are independent learners who must complete readings, videos, and assignments to meet personal and institutional deadlines. The content is arranged in four weeks of study. Tasks for each unit should be completed within the week allotted and the final task must be submitted by the last day of class.
