

EDCI 427

Multigrade Classroom Methods

Course Description:

This course is designed to acquaint students with resources, strategies, and practices associated with organizing, planning, and differentiating in a multigrade classroom. Students will be reading some research on multigrade classrooms, reports, discussing different situations in multigrade classrooms through forums, preparing lesson plans using the principle of differentiation, making a timetable following the provincial time allotment for different grades, and creating a LAP (Learning Activity Package) to help the students grasp some difficult concepts. Throughout the course, students will acquire professional, pedagogical, and practical knowledge to teach in a multigrade classroom or a single class with multiple levels.
