## ELEMENTARY EDUCATION TRACK

The Elementary Education Track reflects a subject generalist approach that prepares candidates to teach in any of the content areas typically taught at the elementary level in Alberta schools. The broad liberal arts breadth of the degree and the required curriculum and instruction courses in the professional education component of the program lay the foundation for successful teaching in the elementary classroom.

Because of the careful sequencing of courses in the Bachelor of Education degree, candidates should note the Admission Policy for the School of Education.
