

EDPS 342 Educational Measurements

Course Description:

This course is designed to acquaint students with resources, strategies and practices associated with assessment in K-12 classrooms. This course focuses on the roles of teachers, teaching practices, and learners in constructing a classroom environment where every learner experiences success. Students will understand assessment for learning, assessment as learning, and assessment of learning while constructing various evaluation tools. Throughout the course, students will acquire professional, pedagogical, and practical knowledge to implement equitable grading practices.
